## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 5/4/2007 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but references AK and AN have not been considered.

The information disclosure statement filed 5/4/2007 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but references AK and AN have not been considered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1713

(a) The claims are indefinite because the meaning of "low-odor" in claims 1 and 10 (and all claims dependent thereon) cannot be determined. The feature appears to be described in the specification solely on the basis of the opinion of "5 judges" who have rated various odors on a scale of 1-5 in order of increasing odor (see page 24). However, the specification provides no disclosure of which portion of the total range of 1-5 corresponds to "low odor." Furthermore, the arbitrary opinion of 5 persons with wholly arbitrary standards for determining the 1-5 odor value provides no basis for determining the intended scope of "low odor."

(b) Claim 2 is indefinite because the same parameter has been assigned two different ranges.

(c) Claim 6 is indefinite in the limitation that the acrylic acid be "completely neutralized" because in such case the process would be outside the scope of the parent claim. The parent claim requires that a polymer of acrylic acid be made; however, if the acrylic acid were completely neutralized, it would not result in a polymer of acrylic acid because no acrylic acid would remain in the monomer.

(d) Claim 7 is indefinite because it refers to non-existent step c).

#### ***Claim Rejections - 35 USC § 102 or 103***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by DE 10003497.

The reference discloses in the abstract example a method of purifying acrylic acid by fractional crystallization for use in polymerization, including all claimed limitations.

6. Claims 1-5, 7 and 9 are rejected under 35 U.S.C. 103(a) as obvious over DE 10003497.

The reference discloses in the abstract example a method of purifying acrylic acid by fractional crystallization for use in polymerization. The data under EXAMPLE discloses the required component percentages. A full English translation of DE '497 was not available at the time of this Office action, and therefore it cannot be determined whether sufficient basis exists in the reference to support a rejection under 35 USC 102. However, one of ordinary skill in the art would be motivated to make a hydrogel or hydrogel-forming powder because the abstract indicates that the making of absorbent polymers is a primary use for the purified product.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.
